

coDiagnostiX[®]

Implant Planning Software

Predictable and consistent results.

Market-proven and established solution.

300,000+
CASES

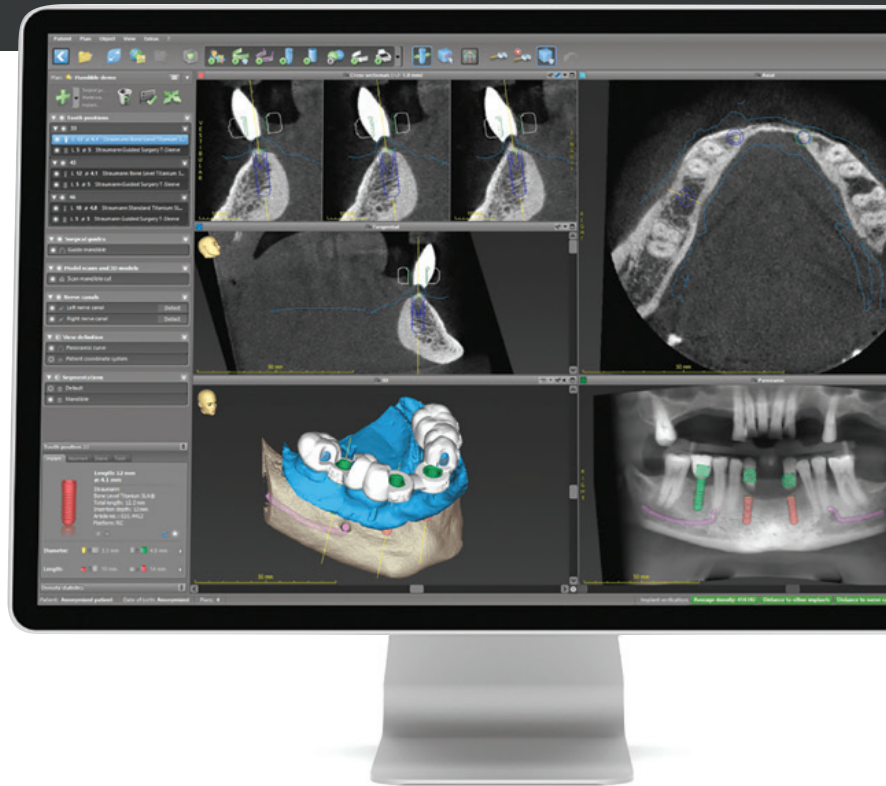

20+
YEARS

Receive predictable results, while minimizing the number of patient visits.

coDiagnostiX is a powerful, but easy-to-use digital solution for implant planning and the design of customized and highly precise surgical guides.

- Enhanced confidence and peace of mind.
- Improved patient experience.
- Quick turnaround times.
- Reduced treatment time.
- Comprehensive case documentation.
- Advanced treatment workflows supported.

#IChoose

“I choose coDiagnostiX because it provides a huge opportunity to improve the clinical outcomes in my clinic. It allows me to maximize performances, studying exactly where and what type of implant-prosthesis and tissue regeneration is needed.”

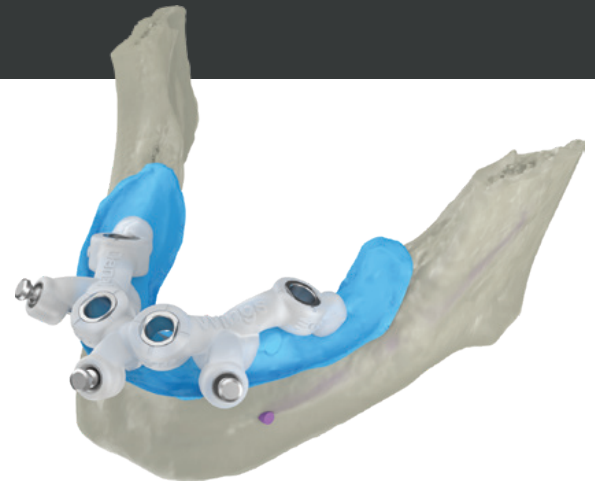

Dr. Andrea Pandolfi, implantologist
Studio Dentistico Pandolfi
Aprilia (Lazio), Italy

A powerful and easy-to-use digital solution.

Highly-precise and customizable surgical guides.

The coDiagnostiX guide designer offers the most flexible design tools to create surgical guides that are exactly tailored to your patient's anatomic needs.

- Time-saving guide design wizard.
- Tooth, gingiva or bone support, plus combined variants available.
- Palatal support and/or lateral fixation to facilitate edentulous cases.

For even more flexibility, surgical guides designed with coDiagnostiX can be produced in-house, by your local lab, or through centralized service providers.

coDiagnostiX
WORKFLOW video:

Benefit from an open system and a completely digital workflow.

Thanks to a fully digital workflow, no scan template is required. Open interfaces ensure compatibility with all implant and sleeve systems as well as open scanners and manufacturing solutions:

- Compatible with all open (CB)CT, intraoral, model, and impression scanners, plus open CAD/CAM solutions.
- Includes a regularly updated library of implant, sleeve, and abutment systems from multiple manufacturers.
- Permits the creation of custom elements to meet individual needs.

Network with your dental partners
efficiently using seamless
communication technologies.

DWOS[®] Connect Connecting dental professionals around the globe.

With a few clicks, scans produced with a Dental Wings 3D scanner can be sent through DWOS Connect and easily imported in coDiagnostiX.

caseXchange[™] Communication platform for coDiagnostiX users.

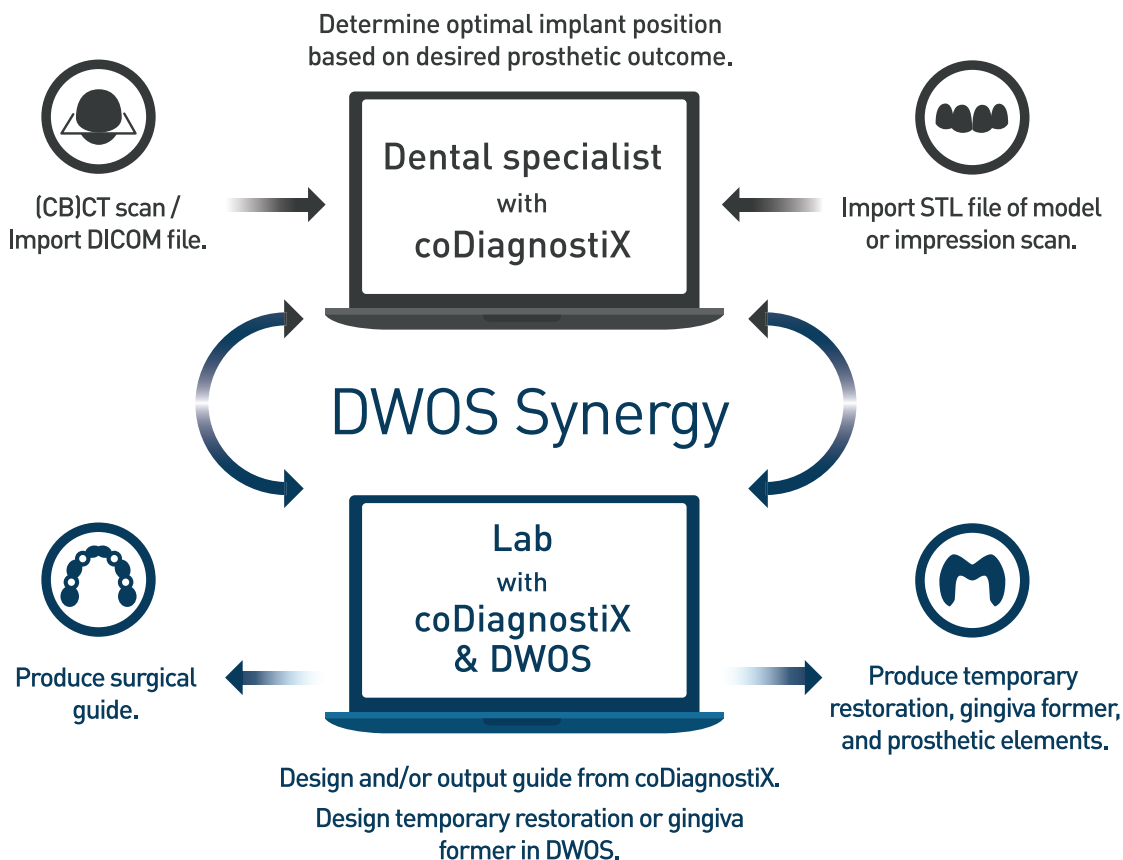

- Send case data to a laboratory to produce surgical guide and/or provide related services.
- Exchange case data with a colleague or expert to get a second opinion or expert advice.
- Send case data to the coDiagnostiX iPad[®] app for case presentation to the patient.

DWOS[®] Synergy

Maximize treatment outcomes through collaborative planning.

Integrate surgical and prosthetic workflows through real-time case sharing between coDiagnostiX and Dental Wings DWOS CAD/CAM to speed up work.

For collaboration with other third-party CAD systems, a separate open interface is provided.

New! coDiagnostiX EASY

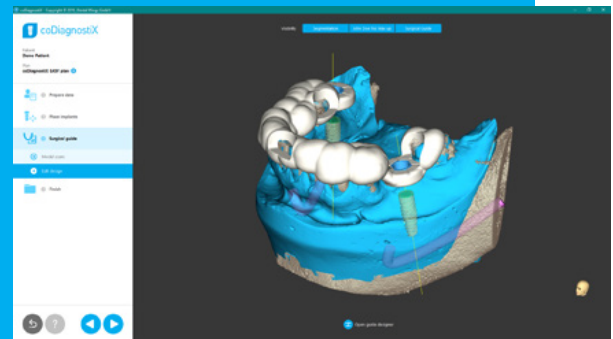

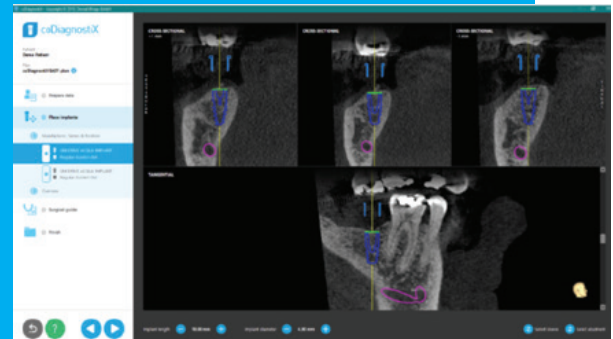

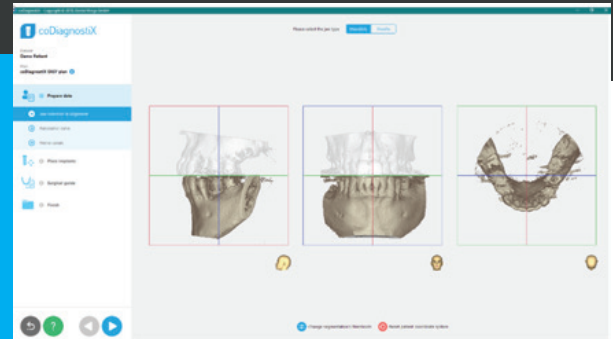

Available now.

The simplified interface and full workflow from dataset alignment to export of surgical guides.

EASY mode is ideal for clinicians who outsource services to a laboratory or planning center.

- Step-by-step user guidance.
- Clear and intuitive user interface.
- Fresh and modern look.

Dental Wings offers attractive licenses with EASY-only functionality. Please refer to the [coDiagnostiX license features at a glance table](#).
